Naturopathic Doctor

Certified BodyTalk Practitioner

PaRama BodyTalk Practitioner

Certified BodyTalk Access Trainer

Take Charge of YOUR Health

Activate Natural Healing By Focusing Your Awareness!

Learn in One Day, Use for a Lifetime, 6 Easy Techniques

- 1) **CORTICES: Balance YOUR Brain.** Get all the lobes of the brain communicating, left to right, back and forth and with all the systems of the body. Kind of like a “re-boot” for your brain.
- 2) **SWITCHING: Reset Your Stress Threshold.** When your body is chronically stressed your fight or flight responses become confused; too easily panicked or too slow to respond and protect your body from harm. This technique optimizes the fight or flight protection mechanism of the body.
- 3) **HYDRATION: Hydrate Your Tissue.** Proper water distribution is critical to every bodily function. Hydration affects blood pressure, nutrient absorption, nerve signal conduction and waste elimination. Life is not possible without water. Health is not possible without proper hydration.
- 4) **BODY CHEMISTRY: Activate Your Immune System.** Your body’s natural defenses are greatly affected by chronic stress. If your immune system overreacts you have allergies, if it under reacts you have infections. This technique optimizes the immune functions.
- 5) **RECIPROCALLS: Align Your Posture and Balance Your Meridians.** This technique will help you balance the movements of 17 pairs of joints while balancing the flow of energy (qi or chi) between the upper and lower acupuncture meridian channels.
- 6) **FAST-AID PROCEDURE:** Focus IMMEDIATE HEALING in the event of accident or sudden illness.

This hands-on workshop is designed to give you theory and PRACTICE, so you will learn these techniques and use them at home or as needed wherever you are. A manual with full color photos is included.
